SUMMARY

Motivated software engineer student with a background in programming languages, algorithms, and data structures. Proficient in Java and web development (HTML, CSS, JavaScript, PHP). Demonstrated success in collaborative agile development teams and independent project implementation, including a Rock Paper Scissors game and a comprehensive eCommerce website. Notable projects include Lecturer Management Database and Banks in Financial Distress, showcasing my ability to manage data and model complex systems. Committed to continuous learning and innovation, I aim to leverage my technical expertise and passion for technology to contribute to impactful projects within a dynamic software development team.

EDUCATION

Bachelor of Science in Information Technology (Software Engineering)

Eduvos - Cape Town, Western Cape

February 2022 to Present

Higher Certification in Information Systems (Software Development)

Eduvos - Cape Town, Western Cape

February 2021 to December 2021

PROJECTS (ON GITHUB)

- **Ecommerce Website** (HTML, CSS, JavaScript, PHP, MySQL): A platform with a user-friendly interface, secure checkout, and comprehensive admin tools for order and inventory management.
- **Rock Paper Scissors game** (HTML, CSS, and JavaScript): the game determines the winner, loser, or tie between the user and computer. Features score counter, reset button, auto-play option, and so on.
- **Lecturer Management Database** (Java): A program that manages lecturer information and campus associations using a database.
- **Banks In Financial Distress** (Java): A simplified banking system model determining bank safety based on total assets.

SKILLS

HTML5	CSS	GitHub (Version Control System)	Figma
JavaScript	PHP	Microsoft Office (Word, PowerPoint, Excel)	Java
Data Structure (In Java)	SQL (MySQL, Microsoft SQL Server)	Kotlin	
Willingness to learn	Teamwork and collaboration oriented	Attention to Details	
Problem Solving	Analytical and Critical Thinking	Communication skills
